

TMAC

Inserts mandrels

TMAC is a high-performance inserts mandrel that allows large-scale production for internal or external clamping of the workpiece.

APPLICATION

- Turning, hobing, shaving, grinding, balancing, inspection and handling

TECHNICAL FEATURES

- Attachment: Spindle nose, in between centers
- Actuation: Automatic or Manual
- Internal or external clamping: smooth, spline and various shapes with one or more rows of inserts.
- Air sensing control on the workstop: With or without

ADVANTAGES

- High accuracy and repeatability, robustness, durability, reliability
- Inserts compensation system which allows to clamp multiple workpieces simultaneously to increase your productivity.
