

TMADC

Double taper expanding sleeve mandrels

TMADC is a double taper expanding sleeve mandrel, designed for internal or external clamping, perfectly cylindrical on the whole surface.

APPLICATION

- Turning, grinding, inspection

TECHNICAL FEATURES

- Attachment: Spindle nose, in between centers
- Actuation: Automatic or Manual
- Internal clamping: smooth or on spline
- Air sensing control on the workstop: With or without

ADVANTAGES

- Accuracy: Concentricity $\leq 10\mu$
- Repeatability, robustness, durability, reliability
- Clamping technology to swing the workpiece through its bore, despite the probability lack of cylindricity of the workpiece.
